Summary

Full Stack Developer with internship and freelance experience delivering production-ready applications and backend automation solutions. Skilled in building cross-platform mobile and web applications using React Native, Spring Boot, and Python, and deploying them with containerization and CI/CD pipelines. Experienced in leveraging cloud platforms (Google Cloud, AWS) to integrate scalable storage and authentication services. Proven success in streamlining data workflows through backend automation and in leading projects such as a 3D interactive portfolio, a secure USB-based password manager, and a cloud-deployed QR code generator with GitHub Actions-based CI/CD. Adept at bridging frontend and backend systems to deliver reliable, user-focused solutions.

EDUCATION

Boston University College of Art and Science

Sep 2022 - May 2026

B.A., Computer Science

- **Coursework:** Distributed Systems, Computer Systems, Cybersecurity, Full Stack Application Development

RELEVANT EXPERIENCES

Asia Inter Rice Co., Ltd.

Aug 2025 - Aug 2025

Full Stack Software Engineer (Freelance)

Bangkok, Thailand

- Developed a Python backend to automate data extraction from PDF, Excel, and XML files, improving data processing efficiency; deployed the solution, including a frontend, as a standalone executable, enhancing workflow speed and accuracy

Datapro Computer Systems

May 2025 - Aug 2025

Software Developer (Intern)

Bangkok, Thailand

- Developed a full-stack passports manager mobile application to be used by travel agencies, from design to deployment, using React Native and a Spring Boot Java backend. The project utilized PostgreSQL, GitLab, Docker, Android Studio, and Expo Go.
- Conducted QA testing using Selenium on a different web application to ensure its functionality and stability before user acceptance testing (UAT).

Asia Inter Rice Co., Ltd.

May 2024 - Jul 2024

IT Support Technician (Intern)

Bangkok, Thailand

- Refurbished PCs by replacing faulty components, removing virus infections, and renewing software licenses. This saved \$12K in hardware and software replacement costs
- Resolved hardware/software issues, saving over \$20K in total costs during an 8-week internship

PROJECTS

3D Interactive Portfolio | <https://github.com/plum-sorathorn/3DPortfolio>

- Built an interactive 3D portfolio using Blender, Three.js, Vite/Node.js, and SCSS.
- Integrated GSAP animations, responsive OrbitControls, and performance optimizations like DRACO compression and lazy loading.

PocketVault – USB-Based Password Manager | https://github.com/kcheb27/EC521_final_proj

- Developed a Chrome extension that securely stores website credentials on a USB drive using AES-256-encrypted SQLite and a FastAPI backend.
- Led front-end development, building the extension UI and core features like autofill, credential capture, and secure master key handling. Also packaged the FastAPI backend into a Windows executable for easy deployment.

QR Code Generator & URL Shortener | <https://github.com/plum-sorathorn/qr-and-url-on-google-cloud>

- Developed a responsive QR code generator and URL shortener and deployed it on Google Cloud
- Integrated Firestore (URL storage) and Cloud Storage (QR image storage)
- Implemented a CI/CD pipeline via GitHub Actions to automate Docker image building, pushing to Google Cloud Artifact Registry, and deployment

CERTIFICATES

- CompTIA Network+
- CompTIA IT Fundamentals (ITF+)
- CompTIA Security+
- CompTIA A+

SKILLS

- **Programming Languages:** Python, Java, Bash, Javascript, HTML, CSS, SCSS, C, Go, AWS, Linux, Windows, Microsoft Office, Wazuh, Visual, OCaml Studio, Github, Docker, Node.js, Vite, Three.js, Gitlab, Android Studio, Expo Go
