WORK EXPERIENCE

Asia Inter Rice Co., Ltd.
Bangkok, Thailand • 05/2026 - 08/2026

Software & Automation Engineer • Freelancer

- Shipped a React/FastAPI property-management system on GCP for 60+ residential units; used Google Cloud Vision to extract utility-meter readings and LINE webhooks to automate billing and reminders.
- Built an Electron/Python data-conversion tool that standardized PDF, Excel, HTML, and XML purchase orders from 11 retailers into ERP-ready records; automated labor costing and cut weekly processing time by >90%.
- Developed a financial reconciliation application with four automated workflows, extracting multi-bank statement data and matching remittances to outstanding invoices using SQLite.

Datapro Computer Systems
Bangkok, Thailand • 05/2025 - 08/2025

Software Developer Intern • Internship

- Built a passport-processing mobile application with React Native (TypeScript), Spring Boot, and PostgreSQL; automated document extraction/validation and deployed the containerized backend on client servers.
- Implemented Docker/GitLab CI/CD, reducing deployment cycles by 40%; used Selenium regression testing and resolved 30+ bugs and edge cases before user acceptance testing.

EDUCATION

Master's of Engineering in Computer Science
Cornell University (Cornell Tech) — New York, NY • 08/2026 - Expected 05/2027

Bachelor's Of Arts in Computer Science
Boston University — Boston, MA • 09/2022 - 05/2026

PROJECTS

Skail | Python, LangGraph, DeepAgents, SQLite
- Built a local-first multi-agent coding harness using LangGraph and DeepAgents, coordinating up to 3 concurrent agents through dependency-aware task scheduling and isolated Git worktrees.
- Implemented budget-aware LLM routing with transactional cost reservations, SQLite session recovery, and automated test/build verification gates; maintained 1,300+ offline tests.

Project SCYLLA | C++, Crow, FastAPI
- Built a dual-engine options analytics platform combining a multithreaded C++ REST service, Python market-data pipelines, and native LightGBM inference for single and batch predictions.
- Developed 5 LightGBM quantile models and chronological walk-forward backtesting to evaluate trading signals, incorporating options flow, volatility, and trend indicators.

Cloud Infrastructure & Data Pipelines | Boston University coursework
- Built Docker/GKE microservices and Apache Beam/Dataflow pipelines processing tens of millions of records; integrated Pub/Sub alerts and least-privilege IAM.

SKILLS

Languages: Bash, C++, Go, Java, JavaScript, Python, SQL, TypeScript

Software & AI: DeepAgents, FastAPI, Flask, LangGraph, React, React Native, Spring Boot

Infrastructure & Data: Apache Beam, AWS, Docker, GCP, Git, GitHub Actions, GitLab CI/CD, GKE/Kubernetes, Linux, PostgreSQL, SQLite

Certifications: CompTIA A+, CompTIA Network+, CompTIA Security+
